

Moving the Message client from one system to another

1.

It is easy to move the Message client from one system to another by copying the configuration files. The ftp.properties and the keystore.jks files have to be moved from the source system to the target system. File locations are:

- in a 32 bit system C:\Program Files\Basware\Basware Message
- in a 64 bit system C:\Users\Public\Basware\Basware Message

Or C:\ProgramData\Basware\Basware Message

Moreover the Message folder is also needed (located usually in C:\ root folder). If you've used the Message on a local machine set it on the target system the same way. (C:\ root folder)

Download the right version of the Message from the Unifiedpost homepage.

LINK: https://unifiedpost.hu/1stbp-message-letoltes/

Be careful: for 32 bit depth systems use the 32 bit installation and for systems with 64 bit depth the 64 bit installation.

2. Choose language

3. The Message wizard will guide you until the finish

4. Choose country

| 😽 1stbp Message 2.7.36 Setup | X |
|---|--|
| Select the sender's country | ${\mathfrak S}$ |
| The selected country is used to provide a suited license agreement. | Austria Belgium Czech Republic Finland France Germany Greece Hungary Ireland Italy Liechtenstein Luxembourg Monaco |
| | < <u>B</u> ack <u>N</u> ext > Cancel |

5. Accept the terms

| 🛃 1stbp Message 2.7.36 License Agreement | |
|---|----------------|
| End-User License Agreement Please read the following license agreement carefully | \mathfrak{S} |
